15_IT_Data_Governance

L_0_15_IT_Data_Governance – Policy & Procedures Framework
(Structured for RAM Enterprise Architecture | Aligned with ISO 27001, ISO 38500, COBIT 2019, ISO 37301, COSO ERM)

15.1 IT & Data Governance Policy

15.1.1 Purpose

Establish governance over:

- IT strategy & digital architecture
- Enterprise data management
- Cybersecurity & privacy
- Systems lifecycle & change control
- Digital risk & compliance

15.1.2 Scope

Applies to:

- All systems (ERP, CRM, DMS, BI, AI)
- Cloud & on-prem infrastructure
- Structured & unstructured data
- Internal users, vendors, contractors

15.2 WBS-Coded Policy Tree

```

└── 15.6 Emerging Technology Governance
    ├── 15.6.1 AI Governance & Ethical Use
    ├── 15.6.2 Cloud Governance Framework
    ├── 15.6.3 API & Integration Governance
    ├── 15.6.4 Digital Innovation Sandbox
```

15.3 SIPOC – IT Governance Oversight

Supplier	Input	Process	Output	Customer
Executive Mgmt	Strategic Priorities	IT Strategy Development	IT Roadmap	Board
Business Units	System Requirements	IT Project Intake	Approved Projects	Departments
IT Dept	Infrastructure Data	Monitoring & Controls	KPI Dashboard	CEO
Risk & Compliance	Risk Inputs	Risk Assessment	IT Risk Register	Audit

15.4 Core BPMN Process Flows

15.4.1 IT Change Management (High-Level BPMN Flow)

1. User submits change request
2. IT logs ticket
3. Impact assessment (risk, cost, downtime)
4. CAB (Change Advisory Board) review
5. Approval / rejection
6. Testing (UAT)

7. Deployment
8. Post-implementation review
9. Documentation update

15.4.2 Data Classification Workflow

1. Data identified
2. Assign Data Owner
3. Classify (Public / Internal / Confidential / Restricted)
4. Define storage rules
5. Apply access controls
6. Monitor compliance

15.5 RACI Matrix (Sample – Access Control)

Activity	CIO	IT Manager	Data Owner	HR	Internal Audit
Role Definition	A	R	C	C	I
User Access Approval	C	R	A	C	I
Access Review (Quarterly)	C	R	A	I	C
Access Revocation	I	R	C	A	I
Control Testing	I	C	C	I	A

R = Responsible
A = Accountable
C = Consulted
I = Informed

15.6 KPI Framework

Domain	KPI	Target
System Availability	Uptime %	≥ 99.5%
Incident Management	MTTR	< 4 hrs
Change Success Rate	% successful deployments	≥ 95%
Data Quality	Accuracy score	≥ 98%
Security	# Critical incidents	0
Backup	Restore test success	100%

15.7 SAP / ERP Control Points

Module	Control Mechanism
User Administration	Role-based access control (RBAC)
Finance	Segregation of Duties Matrix
Procurement	Workflow-based approval
Asset Management	Automated depreciation tracking
Audit Logs	Immutable change logs

15.8 Forms & Templates Registry

Code	Form Name	Linked Procedure
IT-F-01	IT Project Request Form	15.1.2
IT-F-02	Change Request Form	15.4.1
IT-F-03	Access Request Form	15.3.1
IT-F-04	Incident Report Template	15.3.3
IT-F-05	Data Classification Form	15.2.2
IT-F-06	Vendor SLA Evaluation	15.4.5
IT-F-07	IT Risk Assessment Template	15.5.1
IT-F-08	Backup & Restore Log	15.3.5

15.9 IT Governance Risk & Control Matrix

Risk	Control	Type	Frequency	Owner	Standard Ref
Unauthorized Access	RBAC & Quarterly Review	Preventive	Quarterly	IT	ISO 27001 A.9
Data Loss	Automated Backup	Preventive	Daily	IT Ops	ISO 27001 A.12
System Downtime	DR Site & Failover	Preventive	Annual Test	CIO	ISO 22301
Data Breach	Incident Response Plan	Detective	As needed	CISO	ISO 27035
Segregation Conflict	SoD Matrix Review	Preventive	Quarterly	Internal Audit	COSO

15.10 IT Governance Architecture Model (Layered View)

```
Board Level
│
├── IT Steering Committee
│
Management Level
├── CIO
├── CISO
├── Data Governance Council
│
Operational Level
├── IT Operations
├── Security Operations
├── Data Stewards
├── Service Desk
│
System Layer
├── ERP
├── CRM
├── DMS
├── BI
├── Cloud Infrastructure
```

15.11 AI & Emerging Tech Governance (Strategic Component)

Given RAM's AI orientation (09_AI_Knowledge_HUB alignment):

AI Governance Controls:

- Ethical AI approval checklist
- Model validation procedure
- Bias testing protocol
- Human-in-the-loop approval
- Data training source validation
- AI risk categorization

15.12 Integration with Other Manuals

Manual	Integration Point
07_Risk_Compliance	IT Risk Register
08_Master_Data	MDM alignment
09_AI_Knowledge_HUB	AI governance controls
11_Finance_Accounting	ERP controls
12_Treasury_Cash_Management	Payment security
13_Procurement_Commercial	Vendor cybersecurity clauses
14_Human_Resources_Interface	Access lifecycle

15.13 Maturity Model (IT Governance)

Level	Description
1 – Ad Hoc	Reactive, undocumented
2 – Managed	Basic procedures exist
3 – Defined	Standardized across org
4 – Measured	KPI-driven monitoring
5 – Optimized	AI-assisted governance

Next link to hr manual

1 Convert this into a Board-Grade Visual Architecture Diagram
2 Produce full detailed procedure documents (step-by-step per sub-policy)
3 Generate Governance & Controls Mapping to ISO 27001 Annex A
4 Create IT Governance Risk Heat Map
5 Package this into a formal manual document (Word/PDF-ready structure)
