ANNEXS 15
Annex1: Process Architecture Levels 15

1. Purpose of this Guide

This guide explains how the **RAM Policies & Procedures Framework** is structured and how users should interact with it through the **RAM Governance Portal / Knowledge Hub**.

The system ensures:

Figure 1: Guide Objectives

- **Consistency** across all RAM operations
- **Compliance** with governance and regulatory requirements
- **Operational clarity** for all staff and partners
- **Digital integration** with enterprise systems
- **Continuous improvement**

The RAM P&P framework combines **policy governance, operational procedures, digital documentation, and performance management** into one unified architecture.

---

2. RAM Governance Architecture

The RAM governance system is structured in **five layers**.

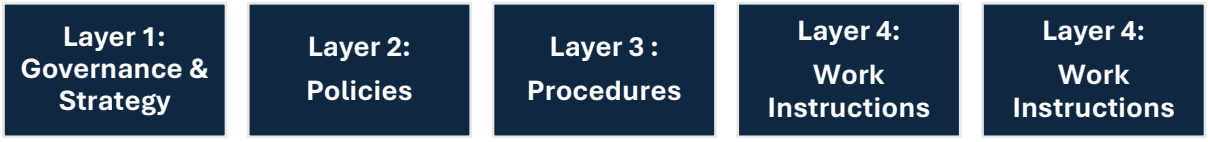

Figure 2: governance system layers.

Layer 1 = Governance & Strategy

Defines the institutional framework.

Examples:

- Vision & Mission
- Corporate Strategy
- Enterprise Architecture
- Governance Framework
- Delegation of Authority (DoA)
- Ethics & Compliance

Purpose:
Defines **what the organization wants to achieve and the rules guiding it**.

Layer 2 = Policies

Policies define **rules and principles**.

They answer:

"What must be done and why?"

Example policies:

- Finance Policy
- HR Policy
- Procurement Policy
- Risk Management Policy
- Internal Control Policy
- Customer Service Policy
- Business Continuity Policy

Policies are **mandatory and approved by senior management**.

Layer 3 — Procedures

Procedures describe **how policies are implemented operationally**.

They answer:

"How do we perform the process?"

Each procedure contains:

- Step-by-step process
- Roles and responsibilities
- Inputs and outputs
- Process diagrams (BPMN)
- System interactions (SAP / digital tools)

Layer 4 — Work Instructions

Work instructions describe **how specific tasks are performed**.

They answer:

“How exactly should this task be executed?”

Examples:

- Enter supplier invoice in SAP
- Approve travel request
- Process tenant complaint
- Register new customer

Work instructions are **practical operational guides**.

Layer 5 — Forms & Templates

Forms and templates provide **standardized operational tools**.

Examples:

- Procurement request form
- Risk assessment template
- Supplier evaluation sheet
- Customer complaint form
- Performance review template

These ensure **consistent documentation across the organization**.

---

3. Cross-Cutting Governance Elements

Every RAM process integrates several governance tools.

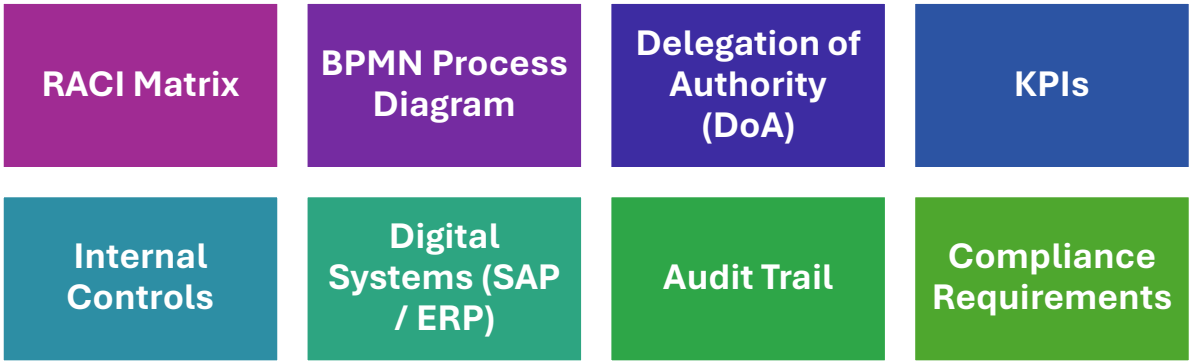

Figure 3: RAM process integrates several governance tools.

These ensure **alignment, control, and performance management**.

Element	Purpose
RACI Matrix	Defines roles (Responsible, Accountable, Consulted, Informed)
BPMN Process Diagram	Visual representation of process workflow
Delegation of Authority (DoA)	Approval limits and authority structure
KPIs	Performance measurement indicators
Internal Controls	Risk mitigation and compliance
Digital Systems (SAP / ERP)	System integration for transactions
Audit Trail	Documentation for internal/external audit
Compliance Requirements	Legal and regulatory alignment

---

4. Standard Structure of Each Policy & Procedure Document

Each RAM process document follows a **standard consulting-grade structure**.

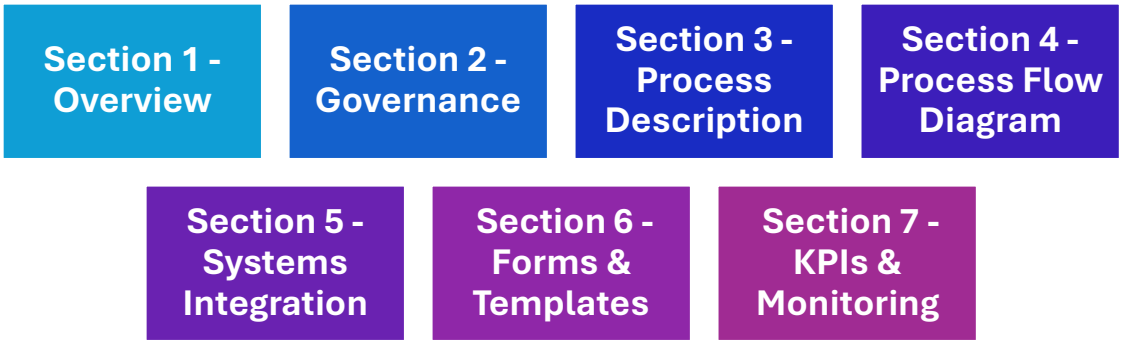

Figure 4: RAM process document structure.

Section 1 — Overview

Contains:

- Purpose
- Scope
- Related policies
- Definitions

Section 2 — Governance

Includes:

- RACI Matrix
- Delegation of Authority
- Compliance requirements
- Internal control points

Section 3 — Process Description

Includes:

- Step-by-step procedure
- Inputs and outputs
- Roles and responsibilities

Section 4 — Process Flow Diagram

BPMN diagram showing:

- Activities
- Decision points
- Roles involved
- System interactions

Section 5 — Systems Integration

Describes how the process interacts with digital systems.

Examples:

- SAP

- CRM
- HRIS
- Document management system
- RAM portal

Section 6 — Forms & Templates

Lists all related forms including:

- Form name
- Purpose
- Responsible owner
- Storage location

Section 7 — KPIs & Monitoring

Includes performance indicators such as:

Examples:

KPI	Measurement
Procurement cycle time	Days
Invoice processing time	Hours
Customer complaint resolution	% resolved
Staff training compliance	% completion

---

5. RAM Governance Portal / Knowledge Hub

The RAM Governance Portal is the **digital platform hosting all policies, procedures, and operational tools**.

The portal ensures:

- Easy access to governance documents
- Smart search across policies
- Version control
- Digital forms and templates
- Integration with enterprise systems

Portal Key Features

Figure 5: Portal Key Features

1 — Smart Policy Search

Users can search by:

- Policy name
- Keywords
- Process name
- Department
- Forms and templates

Search results show **relevant paragraphs and links to documents**.

---

2 — Enterprise Process Architecture

Processes are organized into a **structured governance tree**.

Example:

```
RAM Governance Framework
│
├── Corporate Governance
├── Finance & Accounting
├── Human Resources
├── Procurement
├── Commercial & Sales
├── Customer Services
├── Legal & Contracts
├── Risk & Internal Control
├── Ethics & Compliance
└── Business Continuity
```

---

3 — Interactive Process Maps

Each process includes a **visual BPMN diagram** showing workflow.

Users can navigate:

Figure 6: BPMN diagram showing workflow

---

4 — Document Version Control

Each document includes:

- Version number
- Approval authority
- Issue date
- Revision history

---

6. How to Use the Policies & Procedures

Staff should use the framework in the following sequence:

1. Identify the relevant **policy**
2. Review the **procedure**
3. Follow the **work instructions**
4. Complete the **required forms**

This ensures **compliance and operational consistency**.

---

7. Forms & Templates Management

Forms and templates are stored in the **RAM Forms Library**.

Each form includes:

Item	Description
Form code	Unique identifier
Form name	Official title
Owner	Responsible department
Process linkage	Related procedure
Storage	Portal location

Forms may be:

- PDF forms
- Digital forms
- Excel templates
- SAP forms

---

8. Capacity Building & Training

Successful implementation requires **continuous staff training**.

Training includes:

- Onboarding training for new employees
- Process training by department
- SAP / digital systems training
- Governance and compliance training

Training materials include:

- Manuals
- Quick guides
- Video tutorials
- Simulation exercises

---

9. Quality Control & Compliance

RAM maintains governance quality through:

Internal Controls

Each process contains control points.

Examples:

- Approval levels
- Dual authorization
- Documentation verification

Internal Audit

Internal audit verifies:

- Compliance with procedures
- Effectiveness of controls
- Risk mitigation

Performance Monitoring

KPIs are tracked through:

- Dashboards
- Reports
- Management reviews

---

10. Updating the Policies & Procedures

The framework is updated through a **controlled governance cycle**.

Update Process

1. Department identifies update need
2. Draft revision prepared
3. Governance review conducted
4. Management approval
5. New version uploaded to portal

Version Control

Each document contains:

Item	Description
Version number	v1.0 / v1.1
Date	Issue date
Author	Document owner
Approver	Management authority

---

11. Continuous Improvement

RAM applies **continuous governance improvement** through:

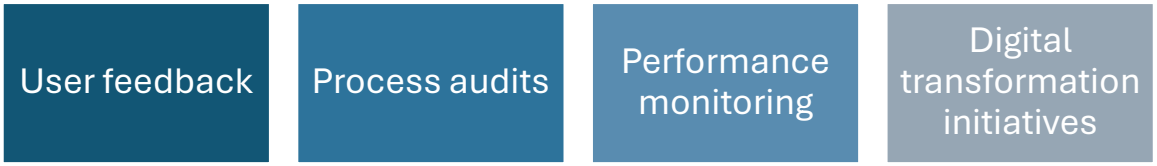

Figure 7: CPI - Continuous governance improvement through:

- User feedback
- Process audits
- Performance monitoring
- Digital transformation initiatives

The system evolves to ensure **operational excellence and transparency**.

---

12. Conceptual Governance Diagram

Architecture diagram.

- Strategy
- Policies
- Procedures
- Work Instructions
- Forms & Templates

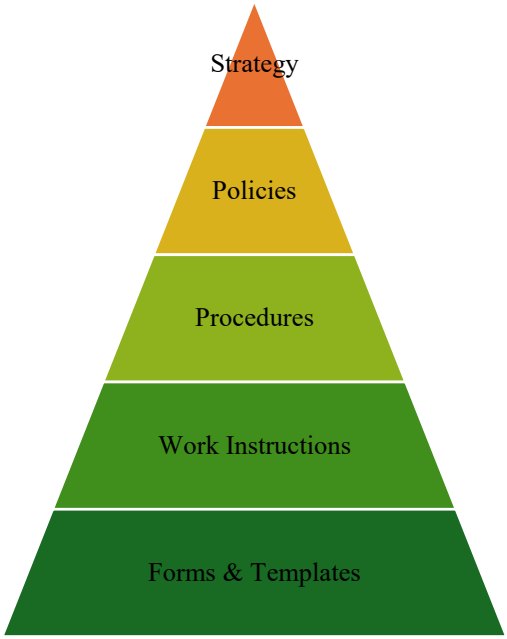

Figure 8: RAM Governance System

Cross-cutting layers around the structure:

- RACI
- DoA
- KPIs
- Internal Controls
- SAP / Digital Systems
- Audit & Compliance

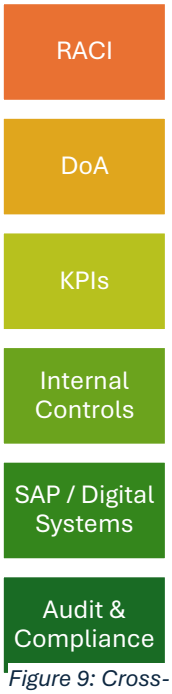

Figure 9: Cross-cutting layers

---

13. How the Portal Supports Digital Transformation

The RAM portal supports digital transformation by:

- Integrating governance with **enterprise systems**
- Enabling **digital workflows**
- Reducing manual processes
- Creating **data-driven governance**

Capabilities may include:

- AI-powered policy search (included as basic style)
- Automated workflow approvals (can be developed in SP or SAP)
- Digital audit trails (Auto version and trails in considered SP)
- BPM automation (Only in case of BP server at a later stage)

✅ This short guide serves as the **orientation document for the entire RAM governance framework**.

ANNEXS

Annex1: Process Architecture Levels

Level	Name	What It Contains	Status in Your System
L0	Enterprise Architecture	Entire organization capability map	✅ Completed
L1	Domains / Frameworks	Governance, Investment, Operations, etc.	✅ Completed
L2	Processes	Leasing, Risk Management, BCM, Procurement	✅ Completed
L3	Procedures	Step-by-step activities	🟡 Partially
L4	Work Instructions / Forms	Templates, checklists, approvals	🟡 Partial
L5	Operational Execution Layer	Systems, dashboards, KPIs, workflows	🔴 Missing

BCM Governance building blocks
