1. PROPERTY ACQUISITION PROCESS

Alternative name:

ASSET ACQUISITION MANAGEMENT

✅ Process Description

This process governs the **end-to-end identification, evaluation, approval, and acquisition of real estate assets**, ensuring alignment with investment strategy, risk appetite, and financial return requirements.

🎯 Objectives

- Acquire high-performing assets
- Ensure risk-controlled investments
- Maximize long-term ROI

📍 Scope

- Market analysis
- Property sourcing
- Financial modeling
- Due diligence
- Approval & acquisition

📜 Policy

- All acquisitions must be supported by an **Investment Memo and Financial Model**
- **Due diligence (legal, technical, financial)** is mandatory prior to approval
- Investments must comply with **approved IRR thresholds**
- Approval must follow **Delegation of Authority (DoA)**
- All acquisitions must be recorded in **SAP RE-FX and FI-AA**
- No transaction may proceed without **formal IC approval**

Evaluate, and acquire profitable real estate assets.

Roles

- Investment Manager
- Legal Department
- Finance Department
- Property Director

Work Instructions

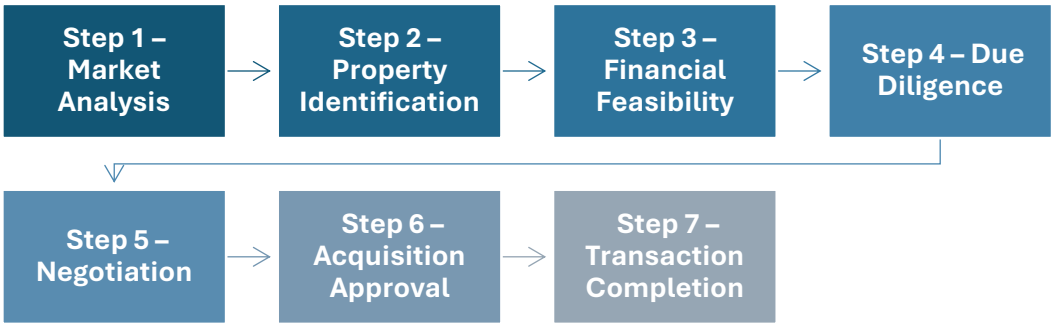

Figure 1: Property Acquisition Process (explained below)

SIPOC

Suppliers	Inputs	Process	Outputs	Customers
Brokers, Market Data Providers	Market data, property listings	Acquisition Process	Approved acquisition	Investors, Portfolio
Legal Advisors	Title documents		Ownership transfer	

RACI MATRIX

Activity	R	A	C	I
Market Analysis	Investment Manager	Property Director	Finance	IC
Due Diligence	Legal	Property Director	Finance	IC
Approval	Investment Manager	IC	Legal	All

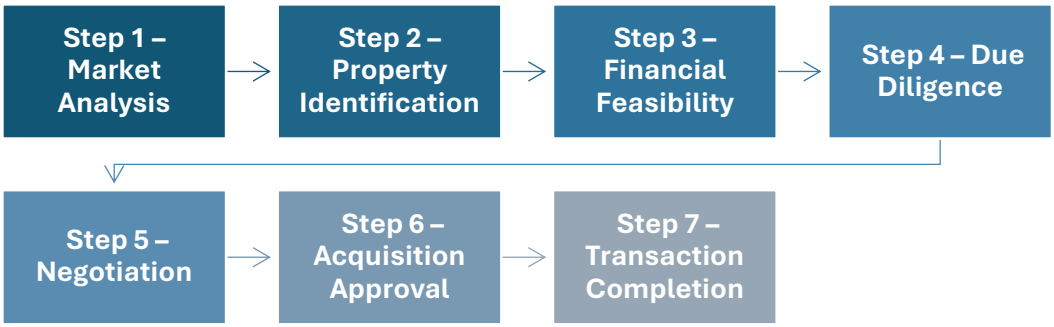
DoA (Delegation of Authority)

Value Range	Approval Level
< $1M	Property Director
$1M – $10M	CFO + Investment Committee
> $10M	Board

Roles

- Investment Manager
- Legal Department
- Finance Department
- Property Director

WORK INSTRUCTIONS



Step 1 – Market Analysis

1. Collect market intelligence on property demand, pricing, and occupancy trends.
2. Identify target locations and asset classes (residential, commercial, mixed-use).
3. Evaluate macroeconomic indicators affecting property values.

Step 2 – Property Identification

1. Source potential properties via brokers, listings, or direct owner contact.
2. Create a preliminary property shortlist.
3. Collect documentation:
    - Title deeds
    - Property plans
    - Ownership records

Step 3 – Financial Feasibility

1. Estimate acquisition price.
2. Conduct financial modeling:
    - ROI
    - Net Operating Income (NOI)
    - Capital expenditure forecast
3. Prepare investment proposal.

Step 4 – Due Diligence

1. Legal due diligence
2. Technical inspection
3. Environmental assessment
4. Verify property ownership and zoning compliance.

Step 5 – Negotiation

1. Negotiate purchase price and conditions.
2. Draft purchase agreement.

Step 6 – Acquisition Approval

1. Submit investment proposal to executive committee.
2. Obtain final approval.

Step 7 – Transaction Completion

1. Execute purchase agreement.
2. Register property ownership.
3. Transfer funds.

KPIs

- IRR vs Target
- Acquisition Cycle Time
- Due Diligence Completion Time

SAP PROCESS STEPS

1. Create Investment Opportunity (SAP RE-FX)
2. Enter Financial Model (FI module integration)
3. Create Asset Master Record
4. Register Acquisition Contract
5. Post Capital Transaction
6. Update Asset Register

FORMS REQUIRED

- Investment Memo
- Due Diligence Checklist
- Acquisition Approval Form
- Property Evaluation Sheet

---

2. PROPERTY MARKETING & LEASING

Alternative name: LEASING MANAGEMENT

✅ Process Description

This process manages the **marketing, tenant acquisition, negotiation, and lease execution** of real estate units to maximize occupancy and revenue.

🎯 Objectives

- Achieve optimal occupancy
- Maximize rental income
- Reduce vacancy periods

📍 Scope

- Market positioning
- Marketing campaigns
- Tenant screening
- Lease negotiation & execution

📜 Policy

- All tenants must undergo **screening and verification**
- Lease terms must comply with **approved pricing strategy**
- All leases must be documented using **standard lease templates**
- Lease approvals must follow **DoA thresholds**
- All leases must be created and managed in **SAP RE-FX**
- No unit may be occupied without **signed lease + payment confirmation**

Roles

- Leasing Manager
- Marketing Team
- Property Manager

🔶 SIPOC

Suppliers	Inputs	Process	Outputs	Customers

Marketing Team	Property data	Leasing	Signed lease	Tenants
Brokers	Leads		Occupancy	

RACI

Activity	R	A	C	I

DoA

Lease Value	Approval
< $50K/year	Leasing Manager
$50K–$200K	Property Director
> $200K	CEO

WORK INSTRUCTIONS

Work Instructions

Figure 2: Property Marketing & Leasing (explained below)

Step 1 – Market Positioning

1. Define target tenant segment.
2. Set rental pricing based on market analysis.

Step 2 – Marketing Preparation

1. Prepare marketing materials:
   - Photos
   - Floor plans
   - Property descriptions
2. Publish listings on:
   - Property portals

    - Company website
    - Social media

Step 3 – Lead Management

1. Capture inquiries.
2. Schedule property viewings.

Step 4 – Property Viewing

1. Conduct property tour.
2. Explain lease conditions and amenities.

Step 5 – Tenant Screening

1. Collect tenant documents:
    - ID
    - Financial proof
    - Business registration (if commercial)
2. Perform background and credit checks.

Step 6 – Lease Negotiation

1. Agree on:
    - Rental price
    - Lease duration
    - Security deposit

Step 7 – Lease Agreement

1. Draft lease contract.
2. Obtain signatures.
3. Collect deposit and first rent.

◆ KPIs

- Occupancy Rate
- Leasing Cycle Time
- Conversion Rate

◆ SAP STEPS

1. Create Tenant Record
2. Create Lease Contract (RE-FX)

3. Define Billing Terms
4. Activate Lease

FORMS

- Tenant Application
- Lease Agreement
- Screening Checklist
- Viewing Report

🔷 3. TENANT ONBOARDING

Alternative name: TENANT ONBOARDING & SETUP

✅ Process Description

This process ensures the **proper setup, documentation, and activation of tenants**, enabling smooth transition into occupancy and operations.

🎯 Objectives

- Ensure accurate tenant setup
- Provide seamless onboarding experience
- Ensure operational readiness

📍 Scope

- Tenant registration
- Payment verification
- Handover
- Utility setup

📜 Policy

- No tenant onboarding without **signed lease + payment verification**
- All tenants must be recorded in **SAP tenant master**
- Property handover must be documented via **inspection report**
- Keys/access must be formally recorded and signed
- Utility registration must be completed before occupancy
- Tenant orientation is mandatory

Roles

- Property Manager
- Facility Manager
- Tenant Relations Officer

🔶 SIPOC

Suppliers	Inputs	Process	Outputs	Customers
Leasing Team	Lease	Onboarding	Active tenant	Operations

RACI

Activity	R	A	C	I
Setup	Property Manager	Director	FM	Finance

DoA

Activity	Approval
Handover	Property Manager
Exceptions	Director

WORK INSTRUCTIONS

Roles

- Property Manager
- Facility Manager
- Tenant Relations Officer

Work Instructions

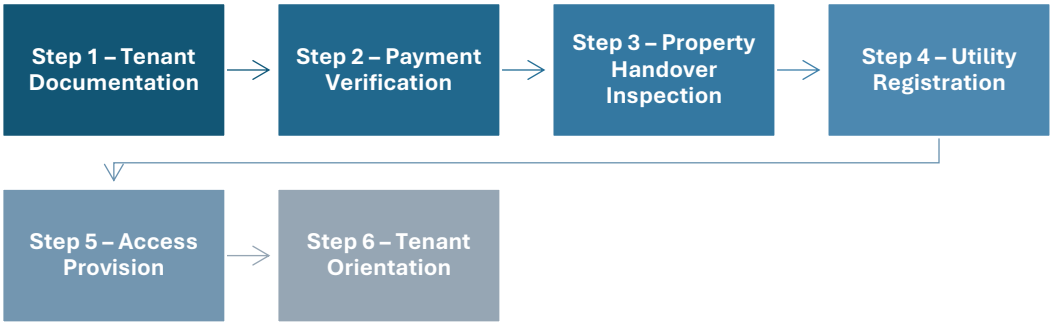

Figure 3: Tenant Onboarding

Step 1 – Tenant Documentation

1. Record tenant details in the property management system.
2. Upload signed lease agreement.

Step 2 – Payment Verification

1. Confirm receipt of:
    - Security deposit
    - First rent payment.

Step 3 – Property Handover Inspection

1. Conduct property inspection.
2. Document condition with photos.
3. Prepare handover report.

Step 4 – Utility Registration

1. Register tenant with utility providers:
    - Electricity
    - Water
    - Internet

Step 5 – Access Provision

1. Issue keys or access cards.
2. Provide building access instructions.

Step 6 – Tenant Orientation

1. Explain building rules.
2. Provide maintenance request procedures.

KPIs

- Onboarding Time
- Tenant Satisfaction

SAP STEPS

1. Activate Tenant
2. Link Lease
3. Register Unit Occupancy

FORMS

- Tenant Info Form
- Handover Report
- Key Form

---

4. RENT COLLECTION & FINANCE

Alternative name: REVENUE & RECEIVABLES MANAGEMENT

Process Description

This process governs **billing, collection, monitoring, and reporting of rental income**, ensuring financial accuracy and cash flow optimization.

Objectives

- Maximize collection efficiency
- Minimize arrears
- Ensure accurate financial reporting

Scope

- Invoicing
- Payment collection
- Monitoring overdue accounts
- Financial reporting

Policy

- All invoices must be generated through **SAP FI-AR**
- Payments must be recorded **immediately upon receipt**
- Aging reports must be reviewed **monthly**
- Overdue accounts must follow **dunning procedures**
- Write-offs require **DoA approval**
- Financial records must comply with **audit standards**

Roles

- Finance Department
- Property Manager
- Accounting Team

SIPOC

Suppliers	Inputs	Process	Outputs	Customers
Tenants	Payments	Finance	Reports	Management

RACI

Activity	R	A	C	I
Billing	Finance	CFO	Property	Management

DoA

Amount	Approval
Write-off < $5K	Finance Manager
> $5K	CFO

Work Instructions

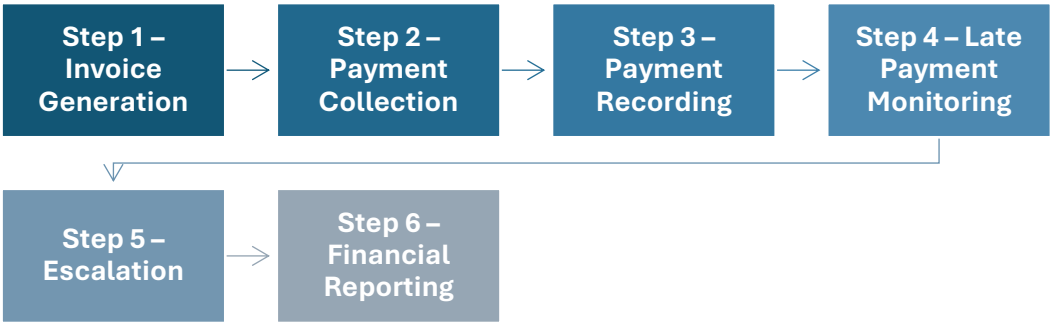

Figure 4: Rent Collection & Financial Management (explained below)

Step 1 – Invoice Generation

1. Generate monthly rent invoices.
2. Send invoices to tenants.

Step 2 – Payment Collection

1. Accept payments through:
    - Bank transfer
    - Online portal
    - Cheque

Step 3 – Payment Recording

1. Record payment in accounting system.
2. Update tenant ledger.

Step 4 – Late Payment Monitoring

1. Identify overdue accounts.
2. Send payment reminders.

Step 5 – Escalation

1. Issue warning notices.
2. Initiate legal action if necessary.

Step 6 – Financial Reporting

1. Prepare monthly financial reports.

3. Analyze property profitability..

◆ KPIs

- Collection Rate
- Arrears %
- Cash Flow Accuracy

◆ SAP STEPS

1. Generate Invoice (FI-AR)
2. Post Payment
3. Update Ledger
4. Run Aging Report

◆ FORMS

- Invoice
- Receipt
- Ledger
- Aging Report

---

5. MAINTENANCE REQUEST HANDLING

Alternative name: REACTIVE MAINTENANCE MANAGEMENT

Process Description

This process manages **tenant-reported maintenance issues**, ensuring timely resolution and service quality.

Objectives

- Ensure rapid issue resolution
- Maintain tenant satisfaction
- Minimize operational disruptions

Scope

- Request intake
- Work order creation
- Execution
- Closure

Policy

- All requests must be logged as **work orders in SAP PM**
- Requests must be categorized by **priority**
- Emergency issues must be addressed immediately
- All work must be **verified before closure**
- No request may be closed without **quality confirmation**
- Maintenance records must be stored in SAP

Roles

- Tenant
- Facility Manager
- Maintenance Technician

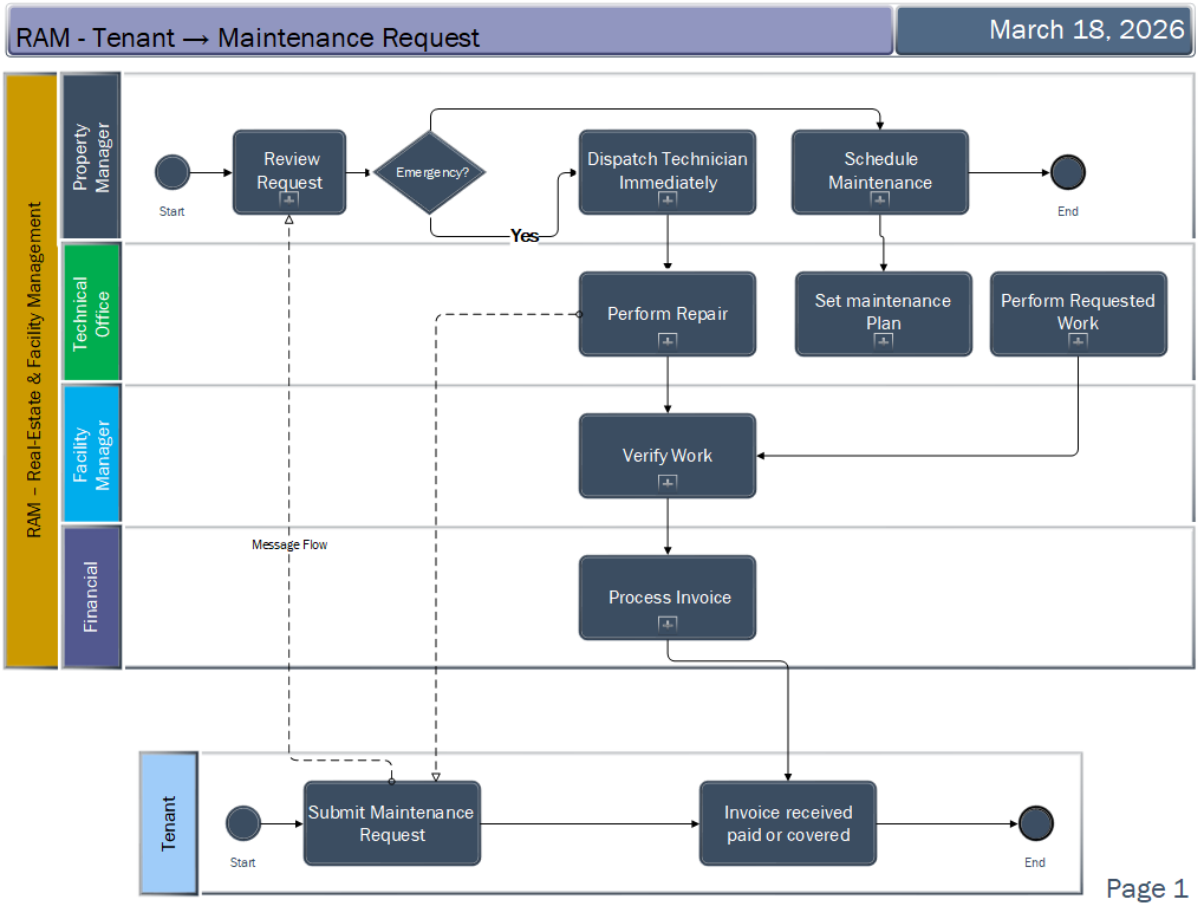

Figure 5: BPMN for Tenant Request

SIPOC

Suppliers	Inputs	Process	Outputs	Customers
Tenants	Requests	Maintenance	Resolved issues	Tenants

RACI

Activity	R	A	C	I
Execution	Technician	FM Manager	Vendor	Tenant

DoA

Activity	Approval
Routine	FM Manager
Emergency	Director

WORK INSTRUCTIONS

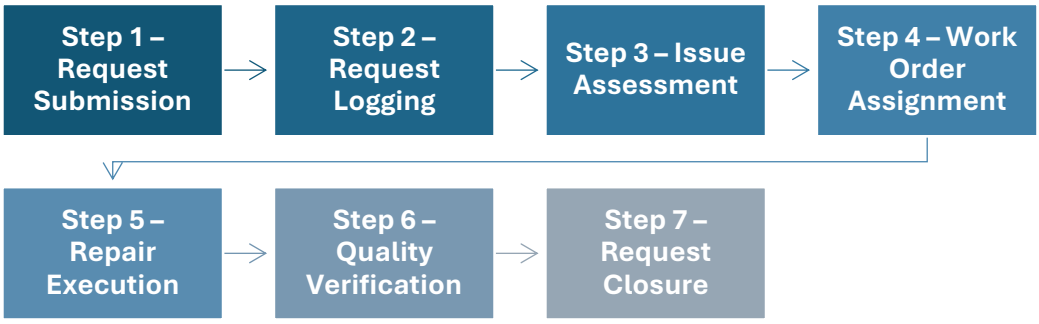

Figure 6: Facility Maintenance Request Handling(explained below)

Step 1 – Request Submission

1. Tenant submits maintenance request via:
    - Mobile app
    - Email
    - Phone

Step 2 – Request Logging

1. Create work order in maintenance system.
2. Assign priority level.

Step 3 – Issue Assessment

1. Facility manager reviews request.
2. Determine repair type:
    - Emergency
    - Routine

Step 4 – Work Order Assignment

1. Assign technician or contractor.
2. Schedule maintenance.

Step 5 – Repair Execution

1. Technician performs repair.
2. Update work order status.

Step 6 – Quality Verification

1. Facility manager inspects completed work.

Step 7 – Request Closure

1. Close work order.

2. Notify tenant.

KPIs

- Response Time
- Resolution Time

SAP STEPS

1. Create Work Order (PM Module)
2. Assign Technician
3. Record Completion
4. Close Order

FORMS

- Maintenance Request
- Work Order
- Inspection Checklist

---

6. PREVENTIVE MAINTENANCE

Alternative name: PLANNED MAINTENANCE MANAGEMENT

Process Description

This process ensures **proactive maintenance of assets** through scheduled activities to extend asset life and reduce breakdowns.

Objectives

- Reduce equipment failure
- Extend asset lifecycle
- Optimize maintenance cost

Scope

- Asset inventory
- Maintenance planning
- Scheduled execution
- Performance tracking

Policy

- All assets must be registered in **SAP PM Asset Register**
- Preventive maintenance plans must be defined for all critical assets
- Maintenance schedules must be **system-generated and tracked**
- PM compliance must be monitored monthly
- Major repairs must follow **DoA approval thresholds**
- Maintenance history must be recorded in SAP

Work Instructions

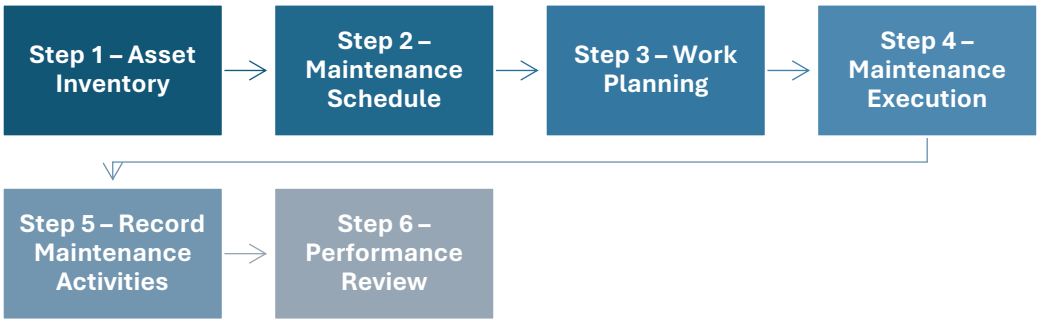

Figure 7: Preventive Maintenance Planning

Step 1 – Asset Inventory

1. Create inventory of all building assets:
    - HVAC
    - Elevators
    - Electrical systems

Step 2 – Maintenance Schedule

1. Define preventive maintenance intervals.

Step 3 – Work Planning

1. Create preventive maintenance work orders.

Step 4 – Maintenance Execution

1. Perform inspections and servicing.

Step 5 – Record Maintenance Activities

1. Document performed maintenance.

Step 6 – Performance Review

Analyze maintenance performance

7. VENDOR & CONTRACT LIFECYCLE MANAGEMENT

Process Description

This process governs the **selection, contracting, performance management, and payment of vendors**, ensuring cost efficiency and service quality.

Objectives

- Ensure reliable vendor performance
- Optimize procurement cost
- Maintain service quality

Scope

- Vendor onboarding
- Tendering
- Contracting
- Performance monitoring
- Invoice processing

Policy

- All vendors must be registered in **SAP MM Vendor Master**
- Vendor selection must follow **competitive evaluation process**
- Contracts must include **defined SLA and KPIs**
- All work must be supported by **approved work orders**
- Invoices must be verified before payment
- Vendor performance must be evaluated periodically

Roles

- Facility Manager
- Maintenance Team

SIPOC

Suppliers	Inputs	Process	Outputs	Customers

- PM Schedule
- Asset Register
- Inspection Checklist

Work Instructions

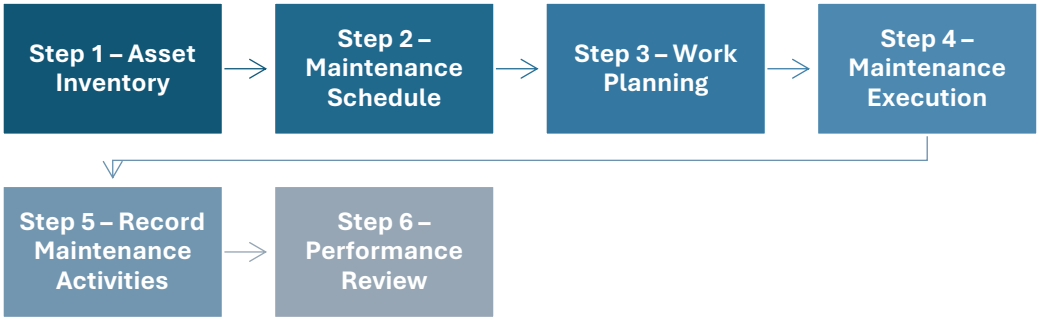

Figure 8: Preventive Maintenance Planning

Step 1 – Asset Inventory

2. Create inventory of all building assets:
    - HVAC
    - Elevators
    - Electrical systems

Step 2 – Maintenance Schedule

2. Define preventive maintenance intervals.

Step 3 – Work Planning

2. Create preventive maintenance work orders.

Step 4 – Maintenance Execution

2. Perform inspections and servicing.

Step 5 – Record Maintenance Activities

2. Document performed maintenance.

Step 6 – Performance Review

1. Analyze maintenance performance.

---

7. VENDOR MANAGEMENT

Roles

- Procurement
- Facility Manager
- Finance

KPIs

- SLA Compliance
- Vendor Performance Score
- Cost Efficiency

SAP

- Create Vendor (MM)
- Create PO
- Manage Contracts

FORMS

- Vendor Registration
- Evaluation Scorecard
- Tender Template
- SLA
- Contract
- Invoice Verification

Work Instructions

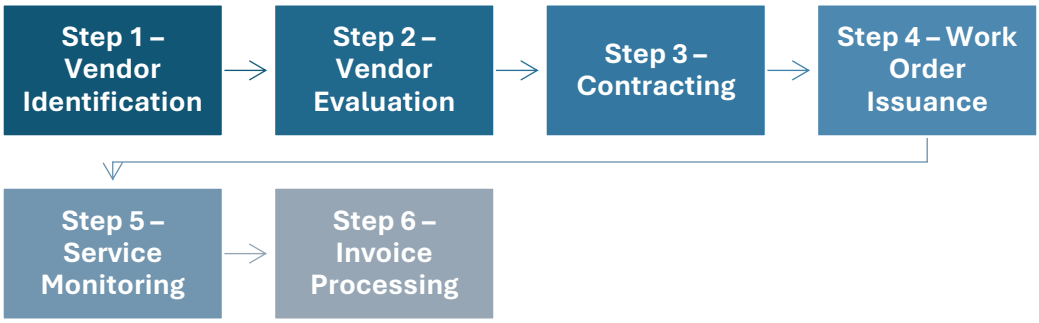

Figure 9: Vendor / Contractor Management

Step 1 – Vendor Identification

1. Identify qualified service vendors.

Step 2 – Vendor Evaluation

1. Evaluate vendors based on:
    - Price
    - Experience
    - Certifications

Step 3 – Contracting

1. Draft service contracts.
2. Define service scope and SLAs.

Step 4 – Work Order Issuance

1. Issue work orders to vendor.

Step 5 – Service Monitoring

1. Monitor vendor performance.

Step 6 – Invoice Processing

1. Verify vendor invoices.
2. Approve payments.

---

8. TENANT MOVE-OUT

Alternative name: TENANT EXIT & TURNOVER MANAGEMENT

Process Description

This process manages the **orderly exit of tenants, financial settlement, and preparation of units for re-leasing**.

Objectives

- Ensure smooth tenant exit
- Recover damages
- Minimize vacancy time

Scope

- Notice handling
- Inspection
- Settlement
- Unit preparation

Policy

- Tenants must provide formal **move-out notice**
- Exit inspection is mandatory before settlement
- Damages must be documented and costed
- Deposit refunds must be processed per policy
- Lease must be formally closed in **SAP RE-FX**
- Units must be prepared and re-listed promptly

Roles

- Property Manager
- Facility Manager
- Finance

◆ KPIs

- Turnover Time
- Damage Recovery %
- Vacancy Period

◆ SAP

- Close Lease (RE-FX)
- Final Settlement (FI)

◆ FORMS

- Move-Out Notice
- Exit Inspection
- Damage Assessment
- Deposit Settlement

Work Instructions

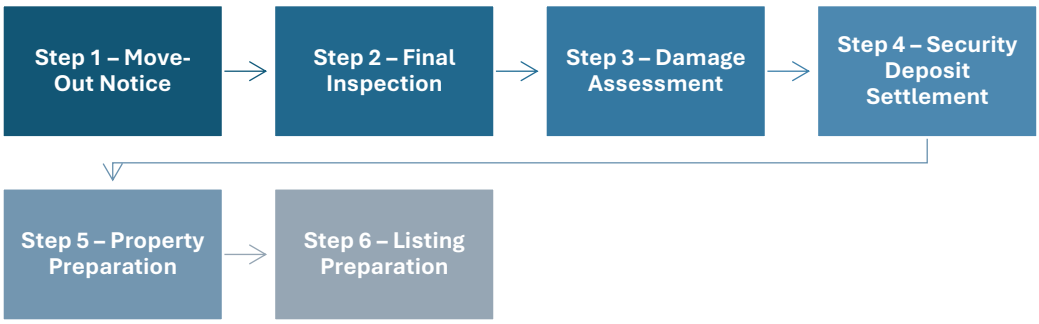

Figure 10: Tenant Move-Out & Property Turnover

Step 1 – Move-Out Notice

1. Tenant submits move-out notice.

Step 2 – Final Inspection

1. Inspect property condition.

Step 3 – Damage Assessment

1. Identify repairs needed.

Step 4 – Security Deposit Settlement

1. Deduct repair costs.
2. Refund remaining deposit.

Step 5 – Property Preparation

1. Perform cleaning and repairs.

Step 6 – Listing Preparation

1. Prepare property for new tenants
